INDEX OF ABSTRACTS
Volume 22 (1975)

ABADIE, Jean. Large scale nonlinear optimization problems arising in power production, A-743.

ABDELAZIZ, Nazar. Bessel functionals and solutions of hyperbolic differential equations in Hilbert space, A-350.

ABDEL-HAMEED, Mohamed and PROSCHAN, F. Total positivity properties of generating functions, A-19.

ABDELKADER, Mostafa A. Circular and hyperbolic functions satisfying $f(x) = f(p - x)$, A-313.

ABE, Kinetsu. Almost contact structures on Brieskorn manifolds and complex structures on their products, A-324.

ABE, Kinetsu and ERBACHER, Joseph. Some examples of non-regular contact structures on Brieskorn manifolds, A-22; Contact structures on the generalized Brieskorn manifold, A-473.

ABIAN, Alexander. Direct product decomposition of alternative rings without nilpotent elements, A-446; The coefficients of the Laurent expansion of analytic functions, A-633.

ACZÉL, J. and BENZ, W. On the harmonic product and a resulting functional equation, A-564.

ADAMS, David R. Bessel potentials and Bochner-Riesz summation operators, A-401.

ADAMS, M. E. and KELLY, David. Chain conditions in free products of lattices, A-673; Disjointness conditions in the free products of lattices, A-674.

ADAMSON, Alan. Admissible sets and saturation of models. Preliminary report, A-714.

ADENIRAN, Tinuoye M. Absolute homology (monotone) union property for X, with coefficient Z. Preliminary report, A-588.

ADLER, Roy L. Ergodic properties of elementary mappings of the unit interval, A-555.

ADOMIAN, G. Nonlinear stochastic systems. Preliminary report, A-666.

ADU, David I. Connected CM-homomorphisms into semigroups of hereditarily locally connected continua. Preliminary report, A-719.

AGGARWAL, Vijay B. Hierarchy of group-free automata under series-parallel decomposition, A-470.

AGGARWAL, Vijay B. and MULLER, David E. Remarks on algebraic decomposition of permutation automata, A-320.

AGRONSKY, Steve. Some analogues of the Lusin-Menchoff theorem and applications. Preliminary report, A-114.

AHMAD, Shair and LAZER, Alan C. Some positivity results for second order systems, A-404.

AHMED, H. S. See NAOUM, A. G.

AHMED, N. U. On the existence of optimal control for systems governed by Ito stochastic differential and functional equations, A-257.

AHNER, John. The exterior Robin problem for the Helmholtz equation, A-728.

AKEMANN, Charles A. The spectrum of a derivation of a C*-algebra, A-567.

AKST, George and DENCE, Thomas P. Linear projection operators on standard threads, A-103.

ALAS, O. T. Three theorems on sigma-m-expandable spaces. Preliminary report, A-27; On compact-expandable spaces. Preliminary report, A-717.

ALBERTSON, Michael O. and HUTCHINSON, Joan P. The maximum size of an independent set in a graph, A-39; The independence ration of a toroidal graph, A-45; Noncontractible cycles in non-planar graphs. Preliminary report, A-533.

ALBIS-GONZALES, Victor. Maximal abelian extensions viewed as Kummer extensions, A-69.

AL-DAFFA', Ali. Thabit ibn Qurra, A-531.

ALDER, Henry L. See HICKERSON, Dean R.

ALEX, Leo J. and MORROW, Dean C. Index four simple groups, A-660.

ALEXANDER, Ralph. Metric averaging in E^2. Preliminary report, A-577.

ALEXANDER, S. and PORTNOY, E. Hypersurface immersions between hyperbolic spaces. Preliminary report, A-580.

ALEXANDERSON, G. L. See HOGGATT, V. E., Jr.

ALFORD, William A., HAVAS, George and NEWMAN, M. F. Groups of exponent four, A-301.

ALI, Mir M. See LANOUE, T. J.

ALIPRANTIS, C. D. On Nakano's theorem and the completeness of locally solid Riesz spaces, A-173.

ALLAIRE, Frank. Reducible configurations for the Four Color Conjecture. Preliminary report, A-42.

ALLEN, G. D. A generalization of a theorem of Cramér, A-242.

ALLEN, George. Variational inequalities, complementarity problems, and duality theorems, A-642.

ALLEN, Richard J. Equivariant embeddings of Z_p-actions in Euclidean spaces, A-684.

ALLISON, Bruce N. Lie algebras of type BC_1, A-97.

AL-MOAJIL, Abdullah H. The commutants of relatively prime powers of elements in operator algebras, A-567.

ALO, Richard. See De KORVIN, Andre.

ALPERIN, Jonathan L. Finite groups viewed locally, A-668.

ALPERT, Louis I. See TORALBALLA, L. V.

ALPERT, Seth R. Current maps and nonorientable graph imbeddings, A-532.

AL-SALAM, Waleed A. and ISMAIL, M. E. H. Polynomials orthogonal with respect to discrete convolution, A-311.

ALTMAN, M. Contractor directions and directional contractions for solving equations, A-337.

ANCEL, Fredric D. and McMILLAN, Daniel R., Jr. Complementary 1-ULC properties for 3-spheres in S^4, A-654.

ANDERSON, Bill and ZUBER, Kenny. Convergence of generalized power series. Preliminary report, A-157.

ANDERSON, Bruce A. Sequencings and starters, A-620.

ANDERSON, Claude W. A new $\mathcal{G}(n)$ in the Waring problem. Preliminary report, A-4.

ANDERSON, D. D. Minimally generated prime ideals. Preliminary report, A-445.

ANDERSON, Donald W. Fibrations and geometric realizations, A-227.

ANDERSON, Gerald. Klein manifolds, A-16.

ANDERSON, James A. Tensor product of commutative semigroups, A-101.

ANDERSON, Joel. Which sets are numerical ranges? A-573.

ANDRUSHKIW, R. I. Inclusion theorems for the eigenvalues of a quadratic operator pencil, A-595.

ANNULIS, John. Order arguments on the dimension of vector lattices, A-175.

APPLESON, Katherine J. A theorem on ordered free groups. Preliminary report, A-720.

APPLING, William D. L. An integrability and measurability decomposition theorem, A-313; Logarithmic and integration-by-parts operators, A-456.

ARAD, Zvi. A classification theorem for CCT groups. Preliminary report, A-705.

ARENSTORF, R. F. Some recent developments in celestial mechanics, A-340.

ARKIN, Joseph. A nonregular Latin 3-cube solution of Euler's 6×6 Officers Problem, A-537.

ARKIN, Joseph and SMITH, Paul. Trebly-magic systems in a Latin 3-cube of order eight, A-347.

ARKIN, Joseph, HOGGATT, Verner E., Jr. and STRAUS, Ernst G. Systems of magic Latin k-cubes, A-38.

ARMSTRONG, Alan. Multipliers on compact groups with unconditionally converging Fourier series. Preliminary report, A-170.

ARMSTRONG, Robert, McGEHEE, Richard and ZICARELLI, John. Some mathematical aspects of the ecological principle of competitive exclusion. Preliminary report, A-263.

ARMSTRONG, Thomas. See READE, Maxwell O.

ARNOLD, Jimmy and GILMER, Robert. Krull dimension of commutative semigroup rings. Preliminary report, A-302.

ARNOLD, Jimmy T. and SHELDON, Philip B. Integral domains which satisfy Gauss's Lemma, A-78.
ARONSON, D. G. Stability for nonlinear parabolic equations via the maximum principle, A-355.
ARTZY, R. Coordinates for Minkowski planes, A-574.
ASENJO, F. G. The topology of multiple location, A-666.
ASH, C. J. and NERODE, A. Functorial properties of algebraic closure and Skolemization. Preliminary report, A-325.
ASIMOV, Daniel. Flaccidity of geometric index for vector fields, A-652.
ASNER, Bernard A., Jr. Representation of the solution of a delay-differential equation. Preliminary report, A-156.
ATALLA, Robert E. Ergodic theory and Grothendieck spaces, A-355.
ATKIN, A. O. L. Supersingular games, A-399.
AULL, Charles E. Initial topologies, k-spaces and accessibility spaces, A-207; The separation axioms of Van Est and Freudenthal, A-584.
AULT, Janet E. Simple inverse semigroups whose $\mathcal{D}$-classes are ω-semigroups, A-100.
AUTH, Joseph. Symbolic transformation groups are point transitive. Preliminary report, A-530.
AZENCOTT, Robert and WILSON, Edward N. Homogeneous manifolds with negative curvature, A-591.
AZIZ, A. K. See LEVENTHAL, Stephen.
BAARTMANS, Alphonse H. and WOEPPEL, James J. The automorphism group of a p-group of maximal class with an abelian maximal subgroup, A-104.
BACHELIS, Gregory. A factorization theorem for compact operators, A-355.
BACON, Philip. Continuous functors, A-28; Finite dimensional shape theory, A-333.
BAERSTEIN, Albert II. The * function for subharmonic functions in n-space, A-413.
BAGBY, Richard J. Lipschitz spaces and Fourier transforms on Lorentz spaces, A-402.
BAGLA, K. L. See RATHY, R. K.
BAILDON, John D. See SILVERMAN, Ruth.
BAILLIEUL, John. Some optimal control problems on Lie groups. Preliminary report, A-418.
BAKER, Crump. Representation of C*-algebras. Preliminary report, A-187.
BAKER, John A. On the functional equation $f(x)g(y) = p(x + y)q(x/y)$, A-565.
BAKKE, V. L. Boundary arcs for integral equations, A-198.
BALARAM, M. Heat generated by MHD Couette flow with porous walls, A-249.
BALAS, Egon. A linear characterization of permutation vectors, A-521.
BALAS, Egon and JEROSLOW, Robert G. Strengthening cuts for mixed integer programs, A-321.
BALAS, Egon and ZEMEL, Eitan. Facets of the knapsack polytope from minimal covers, A-322.
BALASUBRAHMANYAM, P. and LAKSHMINARASIMHAN, T. V. On some classes of functions analytic in the unit disc. Preliminary report, A-712.
BALBES, R. and HORN, A. Projective covers of distributive lattices, A-672.
BALCAR, Bohuslav. See ŠTĚPÁNEK, Petr.
BALCAR, Bohuslav and ŠTĚPÁNEK, Petr. Invariant elements and embedding of Boolean algebras. Preliminary report, A-523.
BALDWIN, John and ROSE, Bruce. Stability, $\aleph_0$-categoricity and finiteness conditions in rings, A-32.
BALDWIN, John T. Some EC_Σ classes of rings, A-682.
BALES, John W. Representable spaces and strongly locally homogeneous spaces, A-477; Representable spaces and strongly N-homogeneous spaces, A-703.
BALL, Eugene S. α-weak normality and related properties. Preliminary report, A-222.
BALL, Joseph A. Canonical models for contraction operators with unitary part. Preliminary report, A-188.
BALL, Joseph and LUBIN, Arthur. Contractive perturbations of restricted shifts, A-188.
BALL, Richard. Ideals of the lattice ordered group or order-preserving permutation of the long line. Preliminary report, A-540.
BALLANTINE, C. S. Conjunctivity and the numerical range, A-546.
BALLEW, David and WEGER, Ronald. Triangular solutions to the Pythagorean equation. Preliminary report, A-441.
BANAUGH, Robert P. See VOTRUBA, George F.
BANCHOFF, T. F. and STRAUSS, C. M. Cusps of simplicial mappings to the plane (with computer graphics analysis), A-201.
BANCROFT, Stephen. A note on the Jordan canonical form, A-83.
BANG, S. Y. and YEH, R. T. Relational algebra and its applications to data representation and structuring. Preliminary report, A-728.
BANILOWER, H. Isomorphisms and simultaneous extensions in C(S). Preliminary report, A-18.
BANKS, H. T. and BURNS, J. A. A note on linear hereditary systems in L^p-spaces. Preliminary report, A-156.
BANKSTON, Paul. Clopen sets in hyperspaces. Preliminary report, A-331; Ultraproducts in topology. Preliminary report, A-392; Baire category and uniform boundedness for topological ultraproducts. Preliminary report, A-480; Ultraproducts in general topology. Preliminary report, A-587; Ultracoproducts: Compactifying the topological ultraproduct, A-656.
BARBACK, Joseph. On the intersection of regressive sets, A-341.
BARBASCH, Dan. Fourier transforms of orbital integrals, A-686.
BARI, Ruth A. Chromatic polynomials and Whitney's broken circuits. Preliminary report, A-532.
BARKER, G. P. See SINGH, S. K.
BARKER, William H. The spherical Bochner theorem on semi-simple Lie groups, A-170.
BARNARD, Roger W. On the radius of starlikeness of $(zf)'$ for f univalent. Preliminary report, A-119.
BARNES, Bruce A. The similarity problem for representations of a B*-algebra, A-427.
BARNES, Bruce H. See MACKEY, Karen E.
BARNES, John and LOMAX, Ron. Two-dimensional simulation of semiconductor devices using finite element methods, A-595.
BARNETTE, David. From convex polytopes to manifolds, A-488.
BAROUCH, Eytan and KAUFMAN, Gordon M. Estimation of undiscovered oil and gas, A-743.
BARTH, K. F., BONAR, D. D. and CARROLL, F. W. Zeros of strongly annular functions, A-122.
BASENER, Richard F. Nonlinear Cauchy-Riemann equations. Preliminary report, A-465.
BASS, Charles D. Piercing connected sets with tame arcs, A-530.
BATEMAN, Paul T. Zeros of Fekete polynomials. Preliminary report, A-68.
BATTERSON, Steve. Dynamical analysis of real Grassmann transformations. Preliminary report, A-685.
BAUMGARTNER, James E. Topological properties of Specker types. Preliminary report, A-219.
BAUMGARTNER, James E., TAYLOR, Alan D. and WAGON, Stanley. Splitting large cardinals into stationary sets. Preliminary report, A-665.
BAUR, Walter. Undecidability of the theory of abelian groups with a subgroup. Preliminary report, A-324.
BAXLEY, John V. On singularly perturbed initial value problems. Preliminary report, A-141.

MEETINGS OF THE AMS
Abstracts Presented to the Society, A-30, A-335, A-394, A-483, A-531, A-657, A-718
Calendars of Meetings, Inside front cover
Preliminary Announcements
March: Mobile, Alabama, 60
New York, New York, 61
April: St. Louis, Missouri, 62, 94
Monterey, California, 63, 96
June: Pullman, Washington, 97, 141
August: Kalamazoo, Michigan, 142, 166
October: Cambridge, Massachusetts, 238
November: Chicago, Illinois, 179, 238
Blacksburg, Virginia, 239, 265
Los Angeles, California, 240, 266
January: San Antonio, Texas, 268, 340
March: Tallahassee, Florida, 352
Urbana, Illinois, 353
Programs of Meetings
January: Washington, D.C., 2
March: Mobile, Alabama, 84
New York, New York, 88
April: St. Louis, Missouri, 130
Monterey, California, 139
June: Pullman, Washington, 164
August: Kalamazoo, Michigan, 206
October: Cambridge, Massachusetts, 256
November: Chicago, Illinois, 259
Blacksburg, Virginia, 332
Los Angeles, California, 337
Short Course
On Mathematics in Operations Research, Washington, D. C., 2, 7
On Applied Combinatorics, Kalamazoo, 142, 166, 174, 206, 214, 223
On Mathematical Aspects of Production and Distribution of Energy, 268, 340, 348

NEW AMS PUBLICATIONS, 79, 127, 157, 201, 252, 284, 372

SALARY SURVEY, Nineteenth Annual, 303

SEMINARS AND INSTITUTES
- 1975 Summer Research Institute on Several Complex Variables, 64, 98, 278
- 1975 Summer Seminar in Applied Mathematics (Modern Modeling of Continuum Phenomena), 64, 98, 278

SITUATIONS WANTED, A-267, A-363, A-432, A-491, A-601, A-689, A-744

SPECIAL MEETINGS INFORMATION CENTER, 76, 120, 160, 194, 248, 294, 367

SPECIAL SESSIONS, ORGANIZERS AND TOPICS, 59, 99, 151, 180, 237, 277, 354

SYMPOSIA
- Symposium on Some Mathematical Questions in Biology, New York, 57
- Symposium on Some Mathematical Questions in Biology, Boston, Massachusetts, 267, 352
- Symposium on Theory vs. Practice in the Finite Element Method, New York, 58

NEWS ITEMS AND ANNOUNCEMENTS, 56, 65, 68, 82, 110, 155, 159, 187, 242, 254, 280, 353, 362

ORGANIZERS AND TOPICS OF SPECIAL SESSIONS, 59, 99, 151, 180, 237, 277, 354

PERSONAL ITEMS, 73, 109, 162, 200, 244, 289, 370

QUERIES, 71, 123, 162, 198, 249, 302, 374

RESERVATION FORMS, A-294, A-438, A-500, A-700, A-702, A-754

SUMMER GRADUATE COURSES, 116 (Supplementary List), 161

TAX STATUS OF GRANTS, 451

VISITING MATHEMATICIANS, 298 (Supplementary List), 78, 119, 369
